Name: Lucy Marks
Role: Receptionist

Name: John Jones
Role: Dental technician

FAQ**Will I need an X-ray at each visit?**

The frequency of dental X-rays will depend on your oral health. If you have good oral health and overall health and have not had cavities for a few years, then you most likely will not require X-rays at each appointment. However, if you have cavities, a history of periodontal disease, or other oral issues, you more require X-rays more often.

When should my child's first dental visit take place?

Children need to begin seeking dental care early on. This will teach your child that visiting the dentist is a regular part of health care. According to the Canadian Dental Association (CDA) children should visit a dentist within six months of the eruption of their first tooth.

How can I get my records transferred?

Original dental records belong to the dentist who provided the treatment, and not the patient, because dentists have to keep all of their records for a period of time, as set out by their provincial dental regulatory body. Once you have selected a new dentist, you can request that a copy of your records be transferred from your former dentist.

How can I make sure my child doesn't avoid the dentist?

It's important to make the first visit a positive experience for your child - one reason why it's best to visit before a problem develops. If you think there is a problem, however, take your child to the dentist right away, no matter what age.

How do in-office and at-home whitening kits vary?

Professional teeth whitening is the safest, most effective and efficient way to whiten your teeth. Our dentists are highly trained and equipped to perform this procedure or provide custom-made whitening trays. Over-the-counter whitening products are less effective and are accompanied by risks.

Will I need an X-ray at each visit?

The frequency of dental X-rays will depend on your oral health. If you have good oral health and overall health and have not had cavities for a few years, then you most likely will not require X-rays at each appointment. However, if you have cavities, a history of periodontal disease, or other oral issues, you more require X-rays more often.

About the clinic

Brilliant Dentistry, a premier dental practice located in North York, Ontario. Our team of dental care professionals is committed to offering the best dental care available for the whole family in a compassionate, relaxed atmosphere, all under one roof, utilizing the most advanced technology available.

Our location is perfect for anyone working in and around Fairview mall as well as, for people that live outside the area as you can conveniently reach our practice via either public transportation or highway 404. A bus stop is located on Sheppard Ave E just in front of our practice. We welcome all ages of patients and we take great pride in being a family owned dental practice.

Testimonials

Best dentist in the GTA, with amazing clinic hours that allow me to work around my busy life schedule and get top of the line dental care. I would highly recommend this dental clinic to anyone in need of a dentist. I've never had a smile this clean and brilliant.

Cynthia Padukone

Made me feel right at home with their professional and welcoming demeanor.

-Mike Wojaki

Thanks brilliant dentistry! Thanks to them i have more confidence in my smile than ever

-Sadie Jones

Would definitely recommend Brilliant Dentistry and will definitely be going there again again.

Joe Philips

My child always hated going to the dentist, but brilliant dentistry, but the amazing staff made them feel safe and calm.

-Sam McDonalds
